

The Virgo Super cluster of Universes is our Home

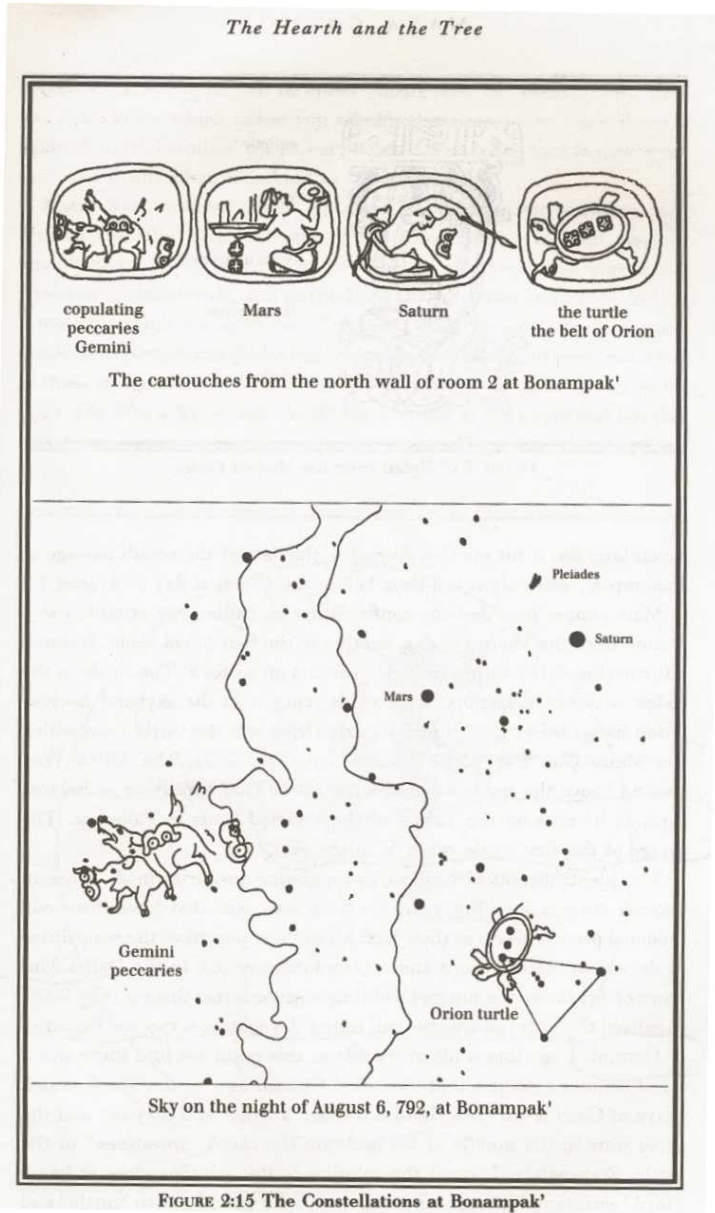

All energy starts from Virgo-Love (First Mother)
and Ursa Major – Bear-Intellect (First Father)

This is where all energies from any universes in the superclusters gather for transmission to our solar system. Virgo is connected to Venus, which is the energy of love, and Ursa Major is connected to Saturn, for the intellect energies and linear time in our galaxy.

These are the primary energies of creation that begin the process of developing and activating all life forms in the superclusters.

Our current 5200 year world cycle
Birth of First Father-June 16, 3122 BC
1 Ahau 8 Muwan
Birth of First Mother-Dec.7, 3121 BC
8 Ahau 18 Tzec

- The birth energies of First Father came from Ursa Major and combined with Saturn. He then energized the Earth (turtle) through the Keyhole in the Belt of Orion.
- The birth energies of First Mother came from Virgo and combined with Mars. She energized the copulating peccaries of Gemini.
- This painting is on the wall of Bonampak in the Maya lands.

Keyhole in Orion's Belt

- Our Solar System is on the arm of Sagittarius, next to the Orion arm
- As the energies enter our galaxy in patterns of three, they must come through the Central Sun of the Pleiades and then the Keyhole on Orion's belt, shown as yellow star and pictured below

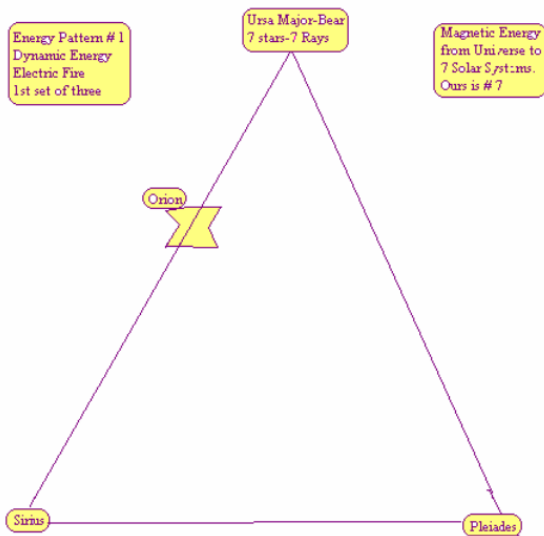

The Galactic plane

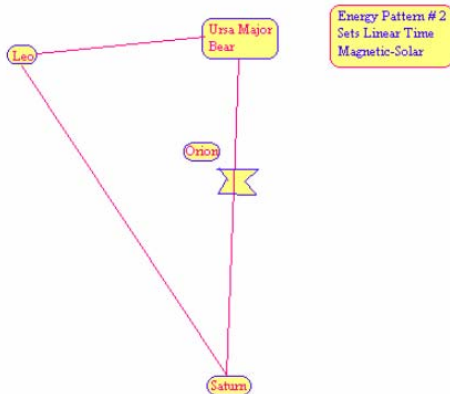

- Our entire solar system rotates at a severe angle called an ecliptic plane.
- The view of the Milky Way Galaxy from this angle makes it look like a flat galactic disc with a bulge as the central sun.

First Causal Energy Pattern Sets the Magnetic Grid

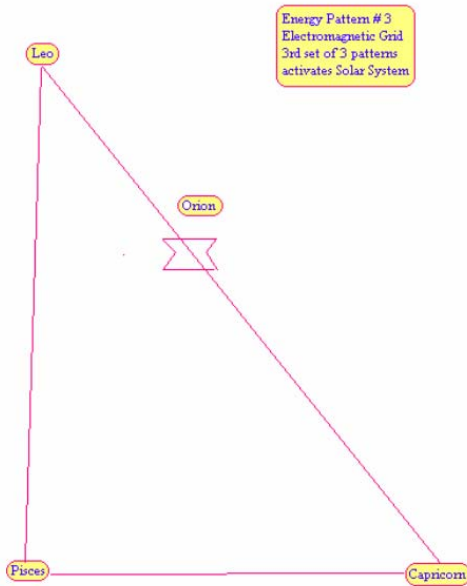

- Ursa Major, the Bear sends magnetic energy to 7 stars in the form of 7 rays to 7 solar systems
- Ours is #7.
- Combines with Sirius & Pleiades, then enters through Orion Keyhole, to our Sun and then to the planets.
- Dynamic energy which is Electric Fire for life forms in all systems.

Causal Energy Pattern #2 Sets Linear Time

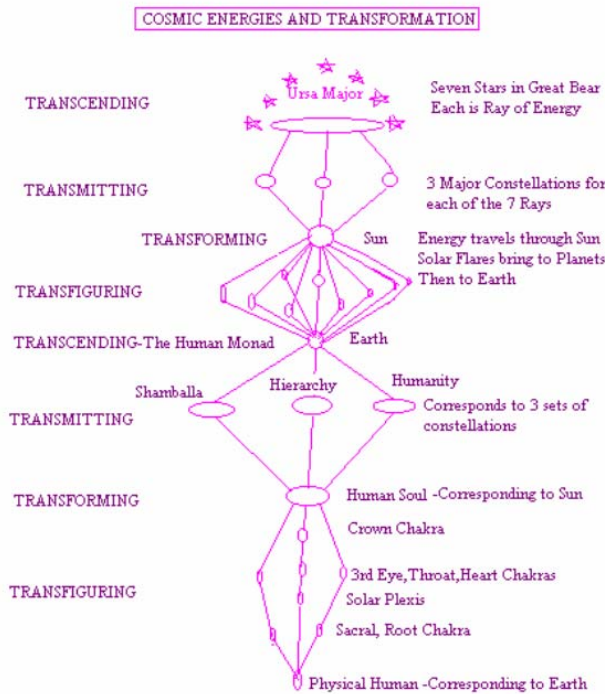

- Ursa Major, the Bear, combines with Leo and comes through the Keyhole of Orion directly to Saturn in our solar system, which creates linear time.
- This is the only pattern that forms in this manner.
- Magnetic-Solar energy

Causal Energy Pattern #3 Sets the Electromagnetic Grid

- Energy from Leo, Pisces and Capricorn combine and come through the Keyhole in the belt of Orion.
- The torus moves these energies through our Sun to our Solar System.

The Cosmic Energies of Transformation

After the three causal energies of the magnetic, time and electromagnetic grids formed in the multi-universes, life in all its myriad of forms needed to have a purpose. The Seven Stars in Ursa Major, the Great Bear were activated by Source/God to transmit continuous pulsars or rays throughout the multi-universes and each ray would activate a purpose for experience of all living forms. The chart shows the patterns of movement all the way down to the human form. The next section will explain the seven rays.
